Please have a chair for each student and tables to do all classroom activities.

Please have writing pens for each student.

It is a great idea to have coffee and donuts or biscuits for breakfast and pizza or sandwiches for lunch. Also water and soda or juice.

I have a laptop that I use during the class. If possible please provide a larger screen. I can plug an HDMI cable into for better viewing for the team members in the class.

Quality safety and torch instruction doesn't cost it PAYS!!!

CLASS STRUCTURE:

Classroom work all morning, then review and a 25 question test. Each team member needs to get at least 18 of the 25 correct before going out for the hands on torching part of the class. Usually classroom portion of the class last 5 to 6 hours depending on the quantity of team members taking the class.

When each individual passes the class they will each be given a CERTA Certification Applicator card good for 3 year certification. Before the 3 year expiration date of the applicator training team member must be recertified. The recertification class last about 5 hours.

The CERTA Certification card needs to be with the team member at all times. A copy of the card should be kept in the employee file at your office. The CERTA applicator card is the applicators card and not the company.

If card is lost or stolen please contact me so I can make sure another card is issued to your team member.

Jim Brauner will share his 39 years of experience during the class.

Team members will be able to interact with each other in front of the class. I have been told by a lot of the team members that my class has built their Self Esteem which is a win for your company. This class will also help with team members hazardous awareness on your jobsite and team work during and after the class. My class makes them better at their trade. Accountability is everything in my classes. I have been a CERTA Trainer since 2004. I have over 310 classes under my belt. I learn something new at every class.

I look forward to the opportunity to work and learn with your team members.

I will come direct to your office to train with your team. Team members learn more in the comfort of their familiar surroundings.

Please check out my testimonials at www.certatraining.com and www.braunersafety.com.

CERTA TORCH CLASS OBJECTIVES

Instructor: Jim Brauner Since 2004

Program Description.

Program Success.
