8:00 AM to 8:30 AM:	Mandatory Class Break

8:30 AM to 9:00 AM

Excavations in Construction

9:00 AM to 10:00 AM

Alternate testing

Students will be engaged throughout the class. They become part of the class.

Each Team Member will be given a Book that they can take home with them. This book contains a lot of roofing related information

There is Book Work during class along with quizzes that allows me the opportunity to make sure that team members completely understand the information that we are going over during the class.

There are power point presentation also during class.

There are videos that are watched during class.

There is hands on during class. Each student needs to bring a harness with them.

I have over 39 years of experience in Roofing and being a professional instructor teaching roofing team members about safety and operation of equipment safely.

Quality instruction doesn't cost it pays.

I look forward to working with your team.

I do nation wide training across the USA and Canada.
